

Work Experience:

Summer 2025: Undergraduate Research Project at Imperial College London

- Investigated the structure and performance of London's public transport network, applying graph theory and data analysis, using python pandas and NetworkX
- Modelled the network as a graph of around 500 nodes and 700 edges to evaluate the network connectivity and resilience
- Analysed 8 different scenarios, identifying patterns and evaluating the impact of network structure changes
- Applied quantitative and computational methods to process and interpret transport network data, developing a rigorous, data-driven approach to problem solving
- Presented research findings clearly through a professional written report and academic poster, communicating technical concepts to a wider audience
- Planned and managed an independent research project over 8 weeks, demonstrating initiative, organisation and attention to detail

September 2023: Product Design & Production, Small Business

- Designed and produced a range of products, including logos, signs and custom components, translating design concepts into finished products
- Operated manufacturing equipment safely and accurately, including laser cutters and mechanical saws
- Assembled and finished products to a high standard, carrying out quality checks to ensure accuracy, consistency and professional presentation
- Developed strong attention to detail, practical problem-solving and technical skills through hands-on product development and production

August 2021 - December 2022: Domino's In-Store Team Member

- Processed customer orders accurately and efficiently both in person and over the phone in a fast-paced, customer-facing environment
- Collaborated with colleagues to prepare orders and maintain efficient service during busy periods
- Followed food hygiene, health and safety procedures to maintain a safe and compliant working environment
- Developed strong communication, teamwork and time management over the 16 months

Education:

- MSc Transport Planning at University of Westminster (graduating August 2027)
- Accomplished a 2:1 in BEng Electrical and Electronic Engineering at Imperial College London
- Attained A* A* A* A in A levels, Maths, Further Maths, Physics and Music respectively
- Achieved a distinction in the ARSM diploma for piano, along with grade 8 distinction in piano, clarinet and music theory
- Completed 10 GCSEs including a 9 in both Maths and English language

Extra skills:

- C++, MATLAB and Python programming
- French (B1) and German (A2)
